

# COFFEE FILTER OCEAN SILHOUETTES

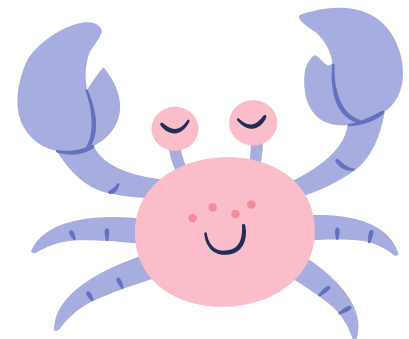

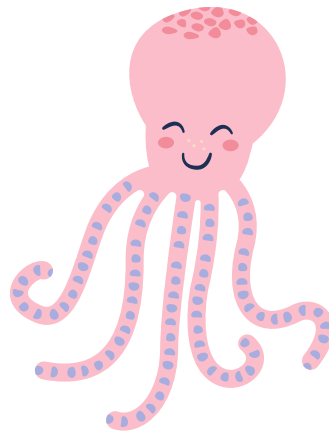

## Lesson of the Day:

Oceans are full of all different kinds of life. Some animals eat other animals, some eat plants. Some lay eggs and some have babies. All of them are important and need to be taken care of. We have to take care of our planet to keep all these animals safe. Recycle! Reuse things when you can! Don't litter! Save the oceans!

## Materials:

- Coffee Filters
- Markers
- Paintbrushes
- Cups with water
- Black construction paper
- Scissors
- Glue

## Instructions:

1. Discuss the lesson of the day with your students. Talk about what it means to them.
2. Have students color the coffee filters with markers. Then they can drip water onto the coffee filters to make the colors bleed. Have them use ocean colors like blue and green, or ocean colors and sunset colors like red, orange, and yellow.
3. Have students draw and cut out ocean animals from black construction paper.
4. Have students glue the animals to the coffee filters.
