

PAPER BIRDS

Lesson of the Day:

Birds flock together! By finding a group of other birds to fly around with, they know that they can all work together to stay safe and be happy. Find your flock! Make friends and build a group. Allow others to join! It's always a good way to be happy and have help when you need it.

Materials:

- Construction paper
- Feathers
- Googly eyes
- Scissors
- Glue
- Optional: brad

Instructions:

1. Discuss the lesson of the day with your students. Talk about what it means to them.
2. Have students cut out a bird shape (it's recommended that you trace one for them to cut out). Have them glue feathers to the tail and the wings.
3. Have students cut out feet and a beak from yellow, black, or orange construction paper.
4. Have them glue the beak, feet, and googly eyes to the bird.
5. You can also make the wings separate from the bird's body and attach them with a brad once the glue dries. That way they move and flap!
