

SHAMROCK SUNCATCHERS

Lesson of the Day:

Four leaf clovers can be really hard to find, especially because there are so many three leaf clovers. But if you keep at it and look hard, the chances that you will find one are high. That's a lesson everywhere- if you work hard, take your time, and never give up, you can find what you're looking for!

Materials:

- Green tissue paper (in various shades)
- Contact paper
- Black construction paper
- Scissors

Instructions:

1. Discuss the lesson of the day with your students. Talk about what it means to them.
2. Have students cut out the outline of a shamrock from black construction paper, or give each student a pre-cut outline.
3. Have kids place the outline onto the sticky side of the contact paper.
4. Have them put small square of green tissue paper into the inside of the shamrock outline. They should use multiple shades to make it more interesting.
5. When they have filled in the whole outline, they put another piece of contact paper over the top with the sticky sides matching up. Then have them cut around the outside of the shamrock outline.
