

SUN MOSAIC

Lesson of the Day:

LESSON

The sun isn't just bright and warm- it helps things to grow by nourishing plants and providing much needed vitamins to people and animals. How do you help others around you grow? How can you be someone's sun?

Materials:

- Printable (next page)
- Blue tissue paper (cut in squares)
- Yellow tissue paper (cut in squares)
- Glue stick

Instructions:

1. Discuss the lesson of the day with your students. Talk about what it means to them.
2. PREP: Print out the following page. Also pre-cut tissue paper into small squares, unless your students can do that themselves.
3. Have students glue the tissue paper squares onto the printable using glue stick. The layering in some areas will provide depth and add to the mosaic look.
4. Challenge students to fill in as much white space as possible.
