

# TOILET ROLL MERMAIDS

## Lesson of the Day:

Mermaids may not be real, but imagining them can be a lot of fun. It's fun to be creative and try new things. So when you see people who are different, who think differently, who like different things, don't make fun of them! Try those new things with them! Try their new ideas and see what you like. Let them be who they are and be who you are! Our creativity and differences are what make us wonderful!

## Materials:

- Toilet Roll
- Construction Paper
- Glue
- Scissors
- Markers
- Glitter Glue
- Paint
- Paint Brush

## Instructions:

1. Discuss the lesson of the day with your students. Talk about what it means to them.
2. Have students paint the toilet rolls in skin colors.
3. While the paint dries, have students cut the construction paper to make a mermaid tail, a strip of green that goes all the way around, hair, and a shell top. Encourage them to draw patterns with markers and decorate with glitter glue.
4. Help students glue the construction paper parts to the toilet paper roll.
5. With markers, have students draw a face and other decorations for the mermaid.
