

# WATER BOTTLE FIREFLIES

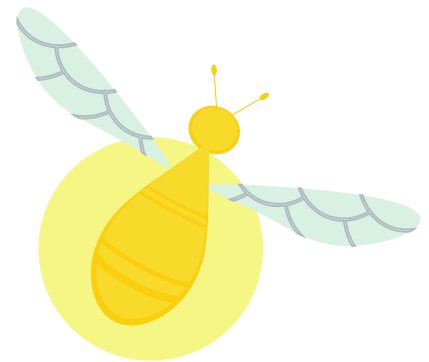

## Lesson of the Day:

Everyone has a light of beauty and kindness inside of them. Do the best you can to let your light show and to see and appreciate the light of other people. Insulting someone about their light might make them afraid to show it. They might hide it away because they are hurt. Be kind and let everyone let their light shine!

## Materials:

- Water bottles
- Pipe cleaners
- Tissue paper
- Glow sticks
- Mod Podge
- Hot glue gun
- Colorful foam
- Googly eyes

## Instructions:

1. Discuss the lesson of the day with your students. Talk about what it means to them.
2. Have students cut strips of tissue paper and affix them to the middle of the water bottles using Mod Podge.
3. Have students wrap three pipe cleaners around the bottle and twist at the bottom to form the insect's six legs.
4. Have them wrap a pipe cleaner around the neck for antennae.
5. Have students cut wings from the craft foam. Hot glue them to the water bottle.
6. Put glow sticks inside and glue googly eyes to the bottle top. You have fireflies!
